PROJECTS

Web-based Online Safari Booking System

(Technology: MERN Stack)

- Developed an Online Safari Booking System as a second-year university group project with a 5-member team using the MERN stack.
- Implemented feedback management and support ticket handling, including feedback collection and ticket creation.
- Generated reports for solved and pending feedback, helping improve service quality and customer response tracking.

Financial Tracking Mobile Application

(Technology: Kotlin)

- This application allows users to track and manage their financial activities such as income and expenses.
- Users can perform CRUD operations to add, view, update, and delete financial records, helping them monitor spending effectively.

Flora Shop Mobile Application

(Technology: Kotlin)

- This mobile application provides an engaging onboarding experience and allows users to browse flower bouquets using scroll and view features.
- Users can add notes to selected bouquets and place orders, enhancing the overall shopping experience.

Flora Shop Mobile App – UI/UX Design

(Tool: Figma)

- Designed onboarding and bouquet browsing screens
- Created intuitive purchase and note-adding flows
- Focused on usability and clean visual design

Sri Lanka Post Website – UI/UX Redesign

(Tool: Figma)

- Redesigned main website UI with prototype and high-fidelity screens
- Improved usability, navigation, and visual appeal
- Focused on creating a user-friendly experience

I hereby certify that above details are true and accurate to the best of my knowledge.
